

## About the University

Dharanidhar University is situated in Keonjhar, a picturesque town nestled in the foothills of the Gandhamardan range in northern Odisha. Originally established as a college in 1957, the institution was later accorded the status of a university in 2023. The university aims to create a niche for itself in the academic world and contribute meaningfully to the development of the region in which it is located as well as to the state and the country. The university has two campuses namely north campus and south campus. It offers 20 post graduate courses and has 39 affiliated colleges under its jurisdiction.

## About Department of Chemistry

The history of the department of chemistry dates back to 1972. It started functioning by offering a B.Sc. (Hons) course while the M.Sc programme started in 1992. The dept. has made its presence felt nationally and internationally by providing human resources both for industry and academia.

## About Keonjhar

Keonjhar district is situated between 21° 1' N to 22° 10' N latitudes and 85° 11' E to 86° 22' E longitudes in Odisha. The district enjoys the reputation of being a leading mines and minerals hub of India. To name a few, Iron, Manganese, Chromite, Quartzite, Gold, dolomite, Pyrophyllite and Limestone are the major minerals found in the district. Focusing on the idea of "from mines to common man", this conference aims to bring together people from mining sector, industry, academia, researchers and young minds to explore new knowledge, solve problems through collaboration to uplift the society and the nation as a whole.

## About the Conference

The conference aims to provide a forum for academicians, scientists, technologists, industries, and young researchers for interaction, idea-exchange, and knowledge-sharing about recent advances made in the field of Material Science. Being multidisciplinary in nature, Material Science encompasses a wide range pertaining to chemical science, physical science, biological science, engineering science applied to health, energy, and environment (viz., drug discovery, tissue engineering, bioelectronics, biosensors, energy sectors etc.). No wonder why, it is of utmost importance for socio-economic welfare of community.
